

**4TH BOLU INTERNATIONAL
POSTER DESIGN COMPETITION**

SELECTED POSTERS AND WINNERS

BOLU, 2023

HAKKINDA

Bolu Uluslararası Poster Tasarım Yarışması, dünyanın her yerinden tasarımcıları belirli konularda farkındalık oluşturmaya ve dikkat çekmeye davet eden ve kâr amacı gütmeyen bir organizasyondur. Bolu Abant İzzet Baysal Üniversitesi tarafından bu yıl dördüncüsü düzenlenen yarışma, organizatör üniversitelerin, yurtiçi ve yurtdışında görev yapan akademisyenlerin üstün gayretleri neticesinde başarılı bir şekilde sonuçlandırılmıştır. Bu yılın teması, "Karasal Yaşam" olarak belirlenmiştir. Bu tema altında; karadaki yaşamı ve canlıları ilgilendiren önemli problemler hakkında farkındalık yaratmayı hedefleyen çalışmalar kabul edilmiştir. Bu konu, Birleşmiş Milletler'e üye olan ülkelerin de üzerinde anlaşma sağladığı 17 Küresel Amaç arasından seçilmiştir.

Yarışma için 11 farklı ülkeden 22 jüri üyesi belirlenerek, değerlendirme kurulu oluşturulmuştur. Yarışmaya 35 ülkeden toplamda 3187 poster ile katılım sağlanmıştır. Jüri üyeleri biahposter.com sitesindeki kişisel oylama paneli üzerinden bireysel bir değerlendirme yaparak süreci tamamlamıştır.

Yaşama dair krizleri en aza indirebilmek için toplumda daha fazla farkındalık oluşturmak gereklidir. BIAH ekibi olarak bu etkinliğin başarı ile sonuçlanmış olmasından gurur duyuyor, benzer etkinliklerin gerçekleştirilmesini ve başarıya ulaşmasını diliyoruz.

ABOUT

Bolu International Poster Design Competition is a non-profit organization that invites designers from all over the world to raise awareness and draw attention to certain issues. The competition, which was organized for the fourth time this year by Bolu Abant İzzet Baysal University, was concluded successfully as a result of the outstanding efforts of the organizer universities and academics working at home and abroad. This year's theme is "Life on Land". Under this theme; posters aiming to raise awareness about important problems concerning life on land and living things have been accepted. This topic was chosen from among the 17 Global Goals agreed upon by the member states of the United Nations.

For the competition, 22 jury members from 11 different countries were selected and an evaluation committee was formed. A total of 3187 posters from 35 countries participated in the competition. Jury members completed the process by making an individual evaluation through the personal voting panel on biahposter.com.

It is necessary to create more awareness in the society in order to minimize the crises in life. As the BIAH team, we are proud of the success of this event and wish similar events to be held and successful.

Wilderness Revival: Nature & Governments United

A Common Voice - A Harmonious Handshake

NATURE BLUEPRINT

Nature's symphony: Our chorus of hope.

This is our chance to preserve nature's blueprint for the well-being of all living beings & the prosperity of our planet. Let us seize this opportunity to build a more sustainable, harmonious future for

Nature
Nature
Nature

Biodiversity for Posterity

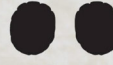

The delicate dance between human needs & the preservation of nature is one of the most complex challenges facing our species today. Striking a balance between development & ecological sustainability requires a fundamental shift in our mindset. As a species, we must plan a pivotal role in fostering a more sustainable future for

adopting eco-friendly practices, transitioning to renewable energy, enforcing circular economy principles, conserving natural resources, promoting sustainable urban planning, engaging local communities, prioritizing environmental education, we can create a world where progress & preservation go hand in hand.

Planet Earth's terrestrial ecosystems are undergoing rapid transformation, largely driven by human activities that threaten biodiversity & the delicate balance of life. As we confront these alarming concerns, it is urgent that governments lead the way in incorporating ecosystem & biodiversity considerations into their planning & development-making plans for the survival of our species & future generations depends on it.

Biodiversity is the foundation of life on land. Governments should prioritize the protection of ecosystems to halt the impending ecological collapse. Conservation efforts should be integrated with comprehensive wildlife trade, deforestation, & habitat destruction. Establishing more protected areas & ensuring their enforcement will help preserve the planet's irreplaceable biodiversity.

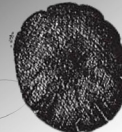

Government initiatives support large-scale restoration projects, such as reforestation & habitat rehabilitation. By investing in these endeavors, we can mitigate the impact of deforestation but also create opportunities for job creation & administration, mitigating the climate crisis simultaneously.

Our Promise
for the survival
of humanity.
